DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-16 in the reply filed on 12/29/2004 is acknowledged.
2. Claims 17-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected specie, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/29/2004.

Drawings

3. Figures 1-2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. ~~The objection to the drawings will not be held in abeyance.~~

Specification

4. The abstract of the disclosure is objected to because it should be limited to a single paragraph. Correction is required. See MPEP § 608.01(b).

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 10-11, and 13-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9, 11, 13-14 and 19-20 of U.S. Publication Numbers 2004/0207583. Although the conflicting claims are not identical, they are not patentably distinct from each other because their scope is similar. For example, "luminescent device" in the pending application and "light emitting device" in the patent indicate the same element.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1- 2 and 9 of U.S. Publication Numbers 2004/0207582. Although the conflicting claims are not identical, they are not patentably distinct from each other because their scope is similar.

Art Unit: 2828

For example, "luminescent device" in the pending application and "light emitting device" in the patent indicate the same element.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kimura, U.S. Pat No 6,529,213.

Kimura discloses the claimed invention including a luminescent device 18-1,18-2 and first and second transistors 17-1,17-2 and 16-1,16-2 for driving the luminescent device, wherein the first and second transistors have different resistance values, see, for example, column 2, lines 9-40, column 5, lines 24-29, figure 6.

10. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Ando et al, U.S. Pat No 6,788,281.

Ando et al disclose the claimed invention including a luminescent device EL and first and second transistors 41A-41D for driving the luminescent device, wherein the first

Art Unit: 2828

and second transistors have different resistance values, see, for example, column 4, lines 24+, column 6, lines 41-60, figures 1-4, claims 13 and 15.

Allowable Subject Matter

11. Claims 2-9 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
